The Basics

- Lifetime, inflation-adjusted income
- Benefits based on your or your spouse’s earnings
- Public sector worker benefits *may* be reduced
- When you claim makes huge difference
- Married? Claiming strategies can boost your combined lifetime benefits

Identify how Social Security relates to your goals: spending, investments, providing for spouse...
1 Estimate Your Benefits

- Must have at least 10 earnings years*
- 35 highest earnings years are considered*
- Create online account to review your statement – www.ssa.gov
- Check your earnings record for accuracy

Projected benefits assume you keep working at recent wages. Retire early and you may get less.

* For benefits based on your own earnings. Separate rules apply to spousal benefits. Earnings are adjusted for inflation based on a Social Security Administration formula.
## 2 Know Your Start Year Options

<table>
<thead>
<tr>
<th>If you start …</th>
<th>Impact on payments</th>
<th>Example of monthly benefit</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AGE 62 or before Full Retirement Age (FRA)</strong>&lt;sup&gt;1&lt;/sup&gt;</td>
<td>Up to 25-30% less&lt;sup&gt;2&lt;/sup&gt;</td>
<td><strong>$1,000</strong></td>
</tr>
<tr>
<td><strong>AGE 66-67 (FRA)</strong>&lt;sup&gt;1&lt;/sup&gt;</td>
<td>Unreduced benefit</td>
<td><strong>$1,333</strong></td>
</tr>
<tr>
<td>After FRA <strong>UP TO AGE 70</strong></td>
<td>About 8% more each year you delay up to age 70</td>
<td><strong>$1,760</strong></td>
</tr>
</tbody>
</table>

1 Based on year of birth. FRA is age 66 for individuals born 1943-1954. Gradually higher for individuals born later.

2 Also receive less if you start after age 62 but before your FRA. Reduction is based on year of birth.
## 3 Know Spousal Benefit Options

<table>
<thead>
<tr>
<th>Once One Spouse Files and the Other is...</th>
<th>What Percent of Their Benefit Can the Other Spouse Receive?</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AGE 62 – FRA</strong></td>
<td>As low as 35%. Cannot then switch to higher benefit based on your earnings</td>
</tr>
<tr>
<td><strong>FRA</strong></td>
<td>50%</td>
</tr>
<tr>
<td><strong>ANY AGE</strong></td>
<td>50%, if caring for child under 16 or disabled</td>
</tr>
</tbody>
</table>

File early? Get lower benefit and may have fewer options. But no benefit to starting after FRA.
4 Evaluate When to Start – Claim Early

- Need the money or in poor health
- Limit withdrawals from savings in down markets
- Get less
- Longer you live, higher inflation is, lower investment returns are…more costly it can be
- Have children that qualify
If Claim Early and Still Working...

Benefits may be reduced but are paid back later\(^1\)

- Applies each year before FRA
- Applies to earnings above $15,720\(^2\)
- Benefits reduced $1 for every $2
- Beginning at FRA, future benefits are adjusted

If claiming early makes sense, don’t not work or work less because you think you’ll lose benefits

---

\(^1\) Refers to gross wages. Withdrawals from savings, investment income, spouse’s income, etc. are not considered. In year you reach FRA, for earnings over $41,880 (2016 figures), benefits are reduced $1 for every $3

\(^2\) 2016 figures.
Evaluate When to Start – Delay

- Valuable insurance against living a long life
- Guaranteed payment boost
- May require excess withdrawals from savings

Option for more flexibility – file and suspend and then if later regret, can receive retroactive benefits
Evaluate Claiming Early – if Married

- Lower earner’s life expectancy is short
- Can switch to higher survivor benefit at FRA
- Reduced benefit payment
- Lose option to switch to benefit based on own record
- May lock spouse into a low survivor benefit
Evaluate Delay – if Married

- Potential to maximize spouse’s survivor benefit – may be key if spouse younger and lower earner

? - If married, consider only higher-earner spouse delay
Evaluate Claim Strategies – if Married…

Restricted Application

Only available to those born before 1954¹

AGE 66 COUPLE

He files restricted claim for $1,000 spousal benefits

She files for $2,000 benefits based on her work record

At age 70, he switches to his higher benefits

Maximize benefit later, get some income sooner. May make sense if both spouses have similar work records.

¹ Also, as of Apr. 30, 2016, is only available if the other spouse has also claimed their own benefit.
5 Explore Options if Got Benefits Too Early

Withdraw your claim and reapply later

- Only within 12 months of first claiming benefits
- Must repay ALL benefits received\(^1\)

Or suspend benefits at FRA

- AGE 62 – began $750 benefits (vs. $1,000 age 66)
- AGE 66 – suspend benefits and earn delay credits
- AGE 70 – receive benefits of about $1,000\(^2\)

---

\(^1\) Including spousal and dependent benefits, if applicable
\(^2\) For illustrative purposes only. Benefits are monthly. Age 70 benefit depends on amount of potential COLAs received.
If Divorced, Know Your Options

Can get higher benefits based on ex’s work record

- Must have been married at least 10 years\(^1\)
- Don’t have to *wait* for ex-spouse to claim
- Ex-spouse doesn’t have to know
- Lose benefits if remarry\(^2\)

If claim early – get lower benefits and lose option to switch later to benefit based on your record

\(^1\) Other conditions apply
\(^2\) Exception: if a divorced spouse remarries at age 60 or later, they can claim *survivor benefits* on a deceased ex-spouse.
If Widowed, Know Your Options

Survivor benefits – can get…

- At FRA, 100% of what spouse\(^1\) got or was or would have been *eligible* to get

- At age 60, *reduced* benefits, then switch to your own benefits\(^2,3\)

- Your own benefits, then switch to survivor benefits

Weigh pros/cons of starting:
1. Your own benefits at age 62 vs. 70
2. Survivor benefits at age 60 vs. 66

1 Or ex-spouse
2 Can get as *early* as age 60 unless you remarried before age 60 (or, if disabled, you can get as early as age 50 unless you remarried before age 50). If you did remarry, explore whether to apply for spousal benefits based on his/her record.
3 Subject to earnings cap if also still working.
If you’re eligible for benefits, your children may be also:

- Child must be under age 18, unmarried OR over age 18, disabled
- 50% of your FRA benefit, *even if* you claimed early
- Multiple children can be eligible
- Spouse under age 62 can get spousal benefit if child under age 16
- Maximum family benefit limit applies

1. If still in high school, child may be eligible at age 19
2. Disability must have begun before age 22
9 Plan Ahead for Taxes

½ Social Security Benefits + Other income = $_____

<table>
<thead>
<tr>
<th></th>
<th>Single Filers</th>
<th>Married Joint Filers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 50% taxable over</td>
<td>$25,000-$34,000</td>
<td>$32,000-$44,000</td>
</tr>
<tr>
<td>Up to 85% taxable over</td>
<td>$34,000+</td>
<td>$44,000+</td>
</tr>
</tbody>
</table>

Benefits are tax-free in many states. Know the laws of your state or the state you are considering moving to.

10 Know if You’ll Get Less as a Public Sector Worker

**WEP**

**Windfall Elimination Provision**
what you/spouse/child get based on *your* earnings

**GPO**

**Government Pension Offset**
what you get based on your spouse’s earnings

Can reduce benefits if you:

1. Earn pension in job, Social Security taxes not paid
2. Qualify for Social Security through other work

Your Social Security statement won’t show the reduction
WEP – How it Works

Reduction **up to ½ pension** or **$428**, whichever is **less**\(^1\)

- Your estimated age 66 monthly benefit
  - $1,428

- Your pension benefit
  - $1,000

- Your Social Security benefit is reduced to
  - $1,000

- Does not affect your *spouse’s* survivor benefits
- No impact if you paid Social Security taxes on 30 years of “substantial earnings”\(^2\)

---

\(^1\) 2016 figures. Refers to monthly benefits

\(^2\) Defined as $22,050 per year (2016)
# WEP – A Detailed Example

<table>
<thead>
<tr>
<th>AIME*</th>
<th>Social Security Benefit without WEP</th>
<th>Social Security Benefit Reduced by WEP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to $856</td>
<td>$770 (90% of $856)</td>
<td>$342 (40% of $856)</td>
</tr>
<tr>
<td>$856 - $5,157</td>
<td>+$1,373 (32% of $4,291)</td>
<td>+$1,373 (32% of $4,291)</td>
</tr>
<tr>
<td>Over $5,157</td>
<td>+$0</td>
<td>+$0</td>
</tr>
<tr>
<td>Monthly Benefit</td>
<td>= $2,143</td>
<td>= $1,715</td>
</tr>
</tbody>
</table>

WEP Impact: $\textbf{428 less} Social Security benefits per month

---

* Average Indexed Monthly Earnings (AIME) refers to the monthly average of your 35 highest years of earnings on which you paid Social Security taxes and is indexed for inflation. It is used to calculate your benefit amount.
GPO – How it Works

Reduction of **2/3 of your pension** amount. No limit – can completely eliminate benefit.

You get government pension of **$600/month**

You’re eligible for **$500 in spouse/survivor benefits**

You get **$100 instead**

Plan ahead – your benefit statement won’t reflect WEP or GPO. Check statement for $0 earning years.

* No reduction if you did pay into Social Security during last 5 years of government service and government pension is based on work for which you did not pay into Social Security.
The Social Security Administration’s Role

- Can provide helpful factual information about the rules and benefits you are eligible for
- Do not provide financial advice or planning – not their job to understand all the factors to consider

Tell them about ex-spouses, decedent spouses, minor or dependent children
